

CareNow®

CARE THAT GOES THE EXTRA MILE FOR YOUR PATIENTS THAT CANNOT

For more than 14 years, My Home Doctor's been helping PCP's provide quality care to patients who have difficulty getting to the office and with the current COVID-19 pandemic we've made our CareNow® Program even more accessible as an added tool for your membership to manage cases remotely via telephonic or virtual visits.

Through our physician-driven, high-touch care model, MHD clinicians along with 24/7 support from an entire MHD Care Team manage patients as an adjunct to your practice.

WHY IN-HOME CARE?

As the results show, our model of care yields improvements in utilization management and medical spend. We also find that treating patients who cannot access the PCP office in the home allows for a more complete perspective that can positively impact your patients quality of life – from health challenges to social issues present in their home.

To learn more about MHD Care Programs:
Visit myhomedoctor.com or contact us at
info@myhomedoctor.com or 888.696.4322

Here are the results:

- ▼ **76%** decrease in admissions
- ▼ **57%** decrease in readmission
- ▼ **43%** decrease in ER visits
- ▼ **38%** decrease in medical expenses
- ▲ **26%** increase in revenue

The CareNow® Program is ideal for your entire population and most importantly your high health care utilizers.

REAL DOCTORS REAL TIME

WHO WE ARE

Group of primary care medical providers treating patients exclusively in the home setting for 14yrs.

WHAT WE DO

- Provide 24/7 accessibility to medical professionals with interdisciplinary support: Physicians, Psychiatrists, NPs/PAs, and RN Case Managers.
- On-going management of patients with chronic or acute conditions who are unable to leave the home.
- Help avoid unnecessary Emergency Department visits and inappropriate Hospitalizations and Readmissions.
- Close HEDIS Gaps in the patients home.
- Patients are seen upon referral to our services by your office.

- We will involve you every step of the way; all medical records and patient coordination will be communicated to your office.
- Continued patient care will be based on your recommendation and our collaboration.

WHO SHOULD BE REFERRED

- Homebound, and bedbound patients.
- Patients which cannot get to the PCP office.
- Patients with +2 Hospitalizations and/or +3 Emergency Room visits in a year period.
- Patients with multiple uncontrolled comorbidities including: Heart Failure (CHF), Chronic Obstructive Pulmonary Disease (COPD), Asthma, Chronic Kidney Disease, Diabetes Mellitus, Coronary Artery Disease, Dementia.
